### FOREIGN STUDENTS

19,100

### Annual Fees

\$62,000-69,000 per year

## OVERVIEW

The University of Toronto is a public research university which was founded in 1827 and is located in Queen's Park, Toronto, Ontario. It is the top-ranked Canadian Universities in all global rankings and has the highest funding for scientific research. Some of the top subjects that are taught here include Biology, Business Analytics, Mathematics and Computer Science. Last year, the University admitted 20,749 international students. This drop in international students is a reflection of the cap that the government has placed on the overall international student enrollment across Canada.
